

Bar Charts  
S1-S3, National 4

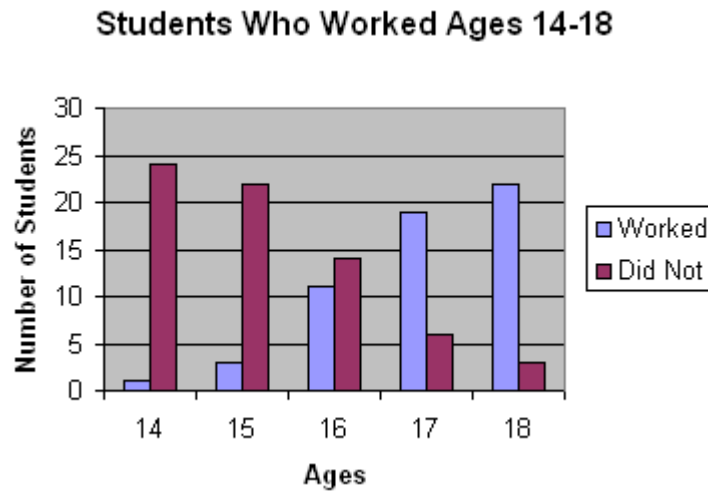

1. The pupils in fourth year at Queen Anne High School voted in the school election. The votes for each candidate are given below:

**Eco:** 86 votes  
**Health:** 24 votes  
**Fairtrade:** 52 votes  
**Community:** 18 votes

Using a suitable scale, draw a bar chart to show this information.

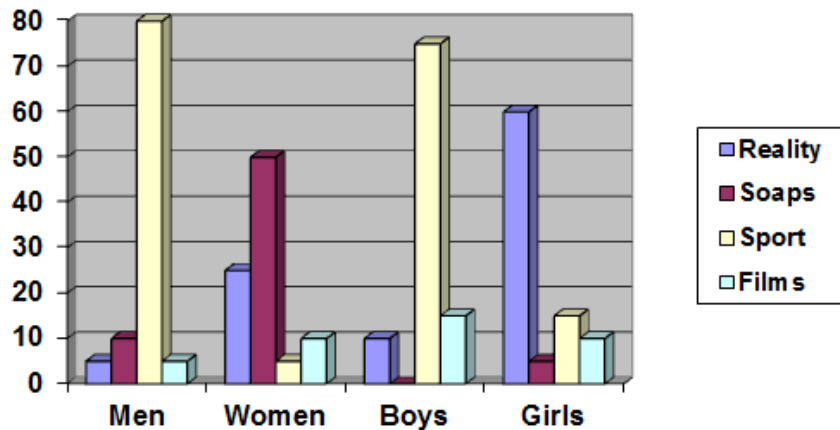

2. A school conducted a survey to establish the number of its students who worked. The compound bar chart below gives the results of the data collected.

Write a comment comparing the number of students who worked across the ages.

3. A group of people were asked what their favourite type of television programme was.

The percentage figures for each category are shown in the compound bar chart below.

- (a) What percentage of women said reality programmes were their favourite?
- (b) Compare the type of television programmes favoured by this group of people.
