

Robert sells mountain bikes.

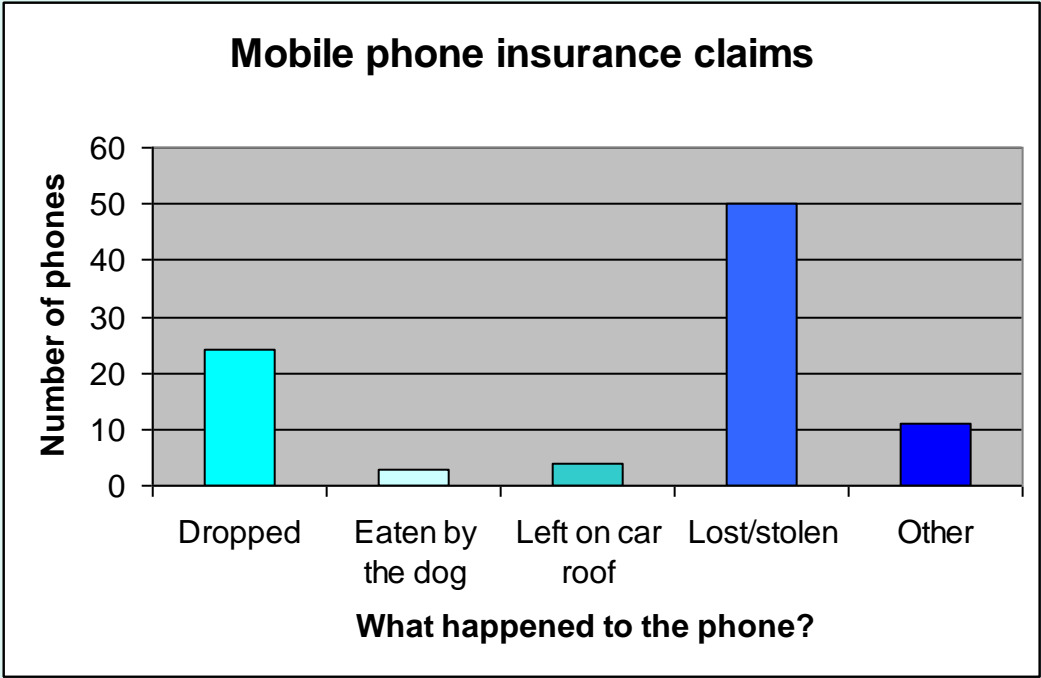

He wants to expand his business, he needs to borrow money from the bank.

He wants to show the bank manager **that his sales are growing fast.**

The two charts show the same information but on different scales.

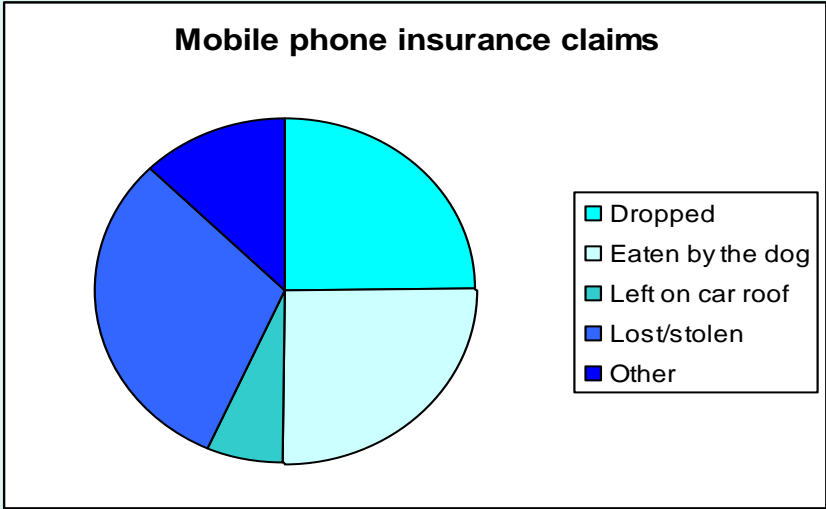

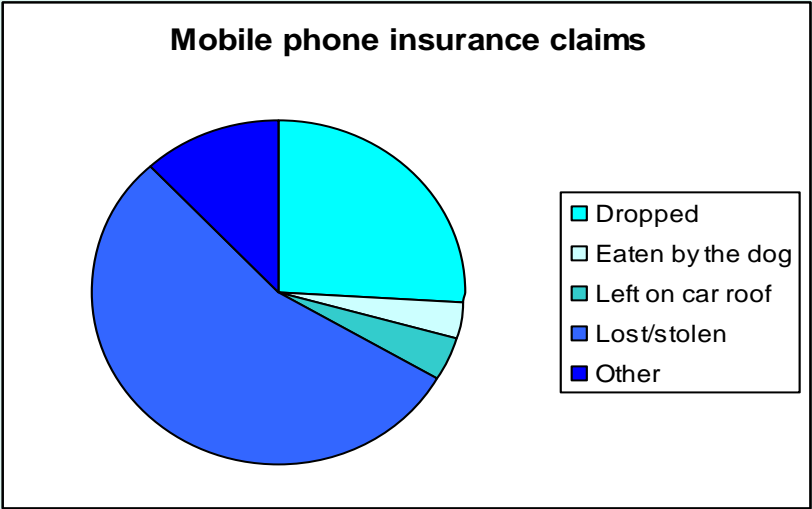

Which chart should he show the bank manager?

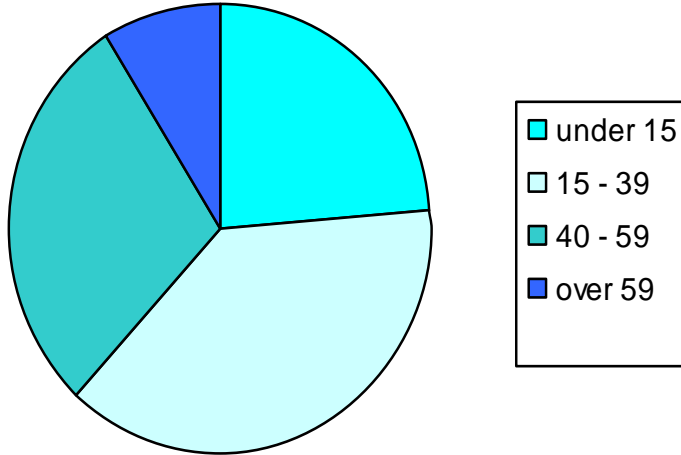

A

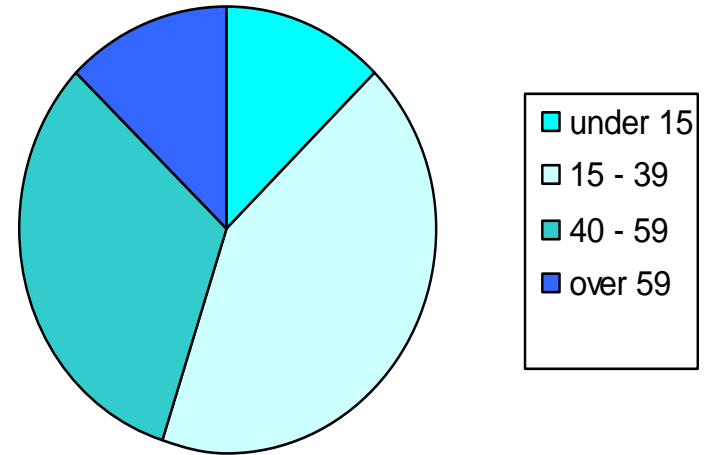

B

Ireland

Greece

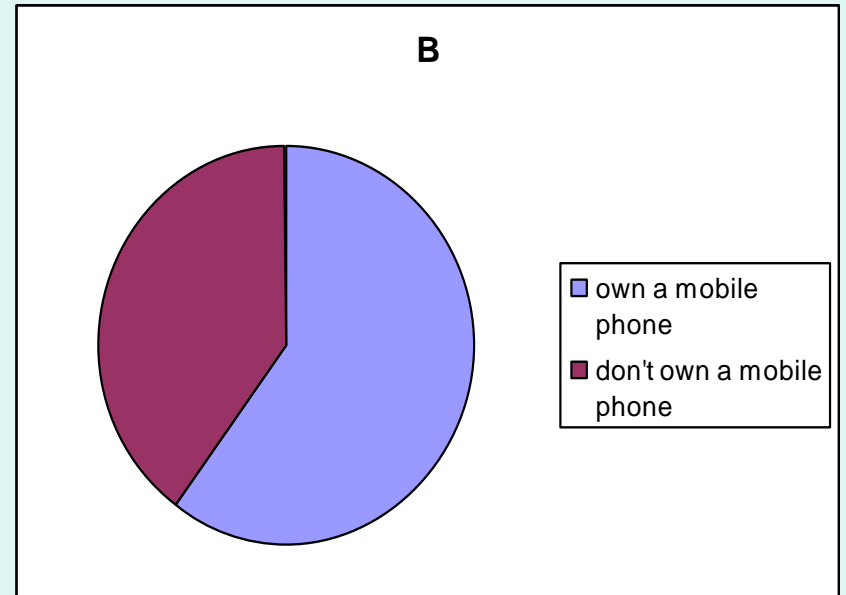

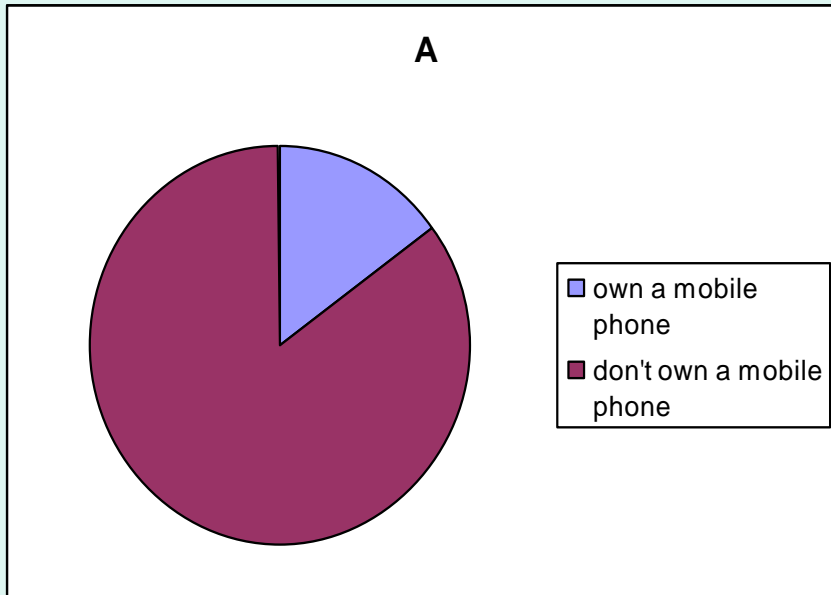

The charts show that:

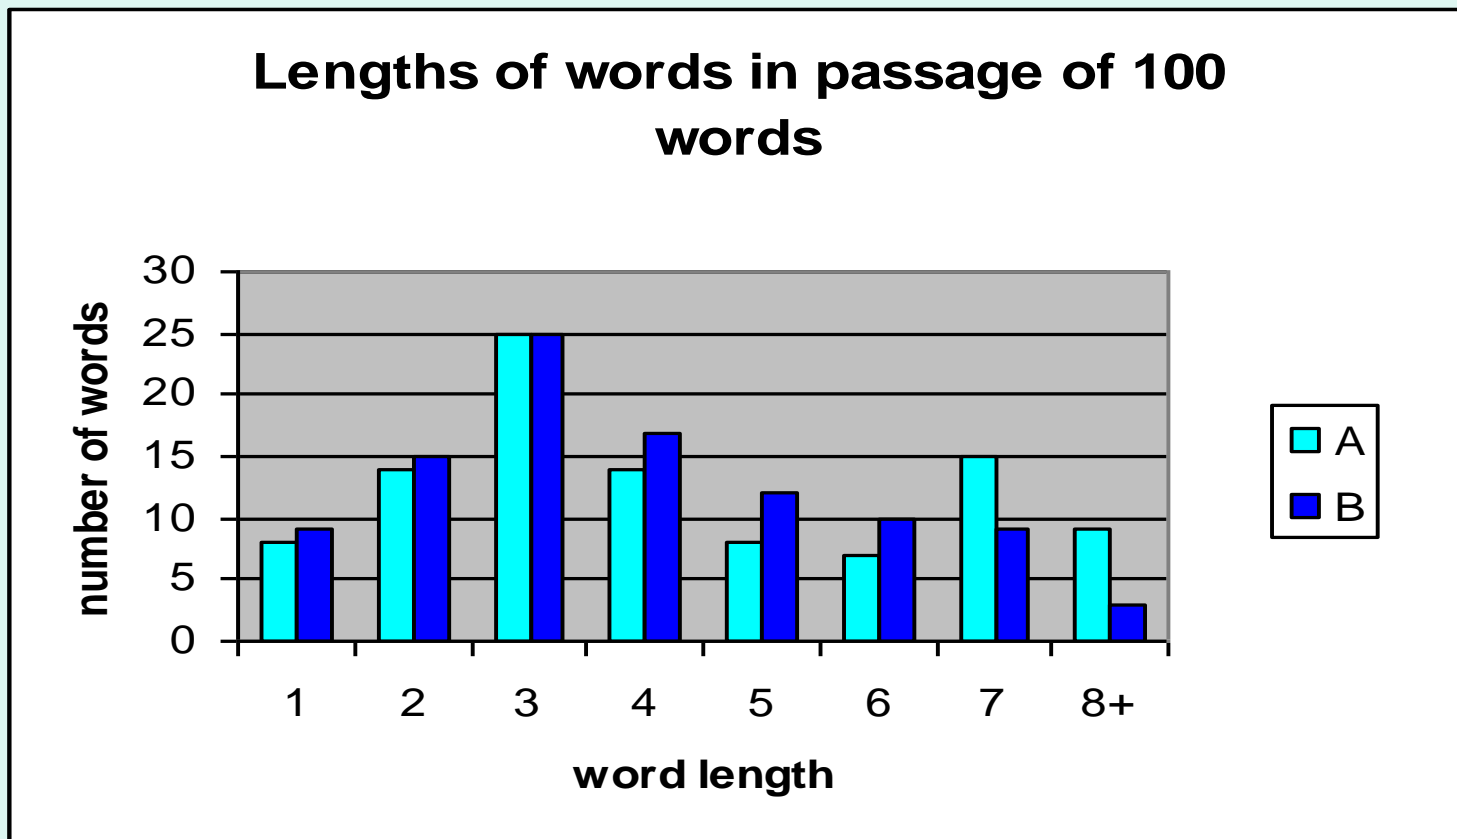

- A there are more people under 15 in Ireland than in Greece;
- B there are fewer people under 15 in Greece than in Ireland;
- C there is a higher proportion of people under 15 in Ireland than in Greece.
